A	Important dates	38
В	Maps of implementation	41

The following document shows preliminary results on the assessment of contagion effects in the implementation of the FCTC, where we measure implementation as number of items implemented in a particular article of the treaty. The method used to evaluate the possibility of contagion effects is Spatial Autocorrelation Models (SAR).

For each combination of network \times article, we estimated the following model:

$$Y = \rho WY + X\beta + \tag{1}$$

$$pol_shift + \tag{2}$$

$$bloomberg_amount + \tag{3}$$

$$bloomberg_count + \tag{4}$$

$$bloomberg_fctc_amount + \tag{5}$$

$$bloomberg_fctc_count \tag{6}$$

Where X are covariates, pol_shift is an indicator of political shift since the ratification of the treaty, bloomberg_amount is amount of money invested from the Bloomberg initiative in that country, bloomberg_count is the number of bloomberg-funded projects in that country, and the last two have the same definition but relative to FCTC related projects only. We are interested in whether (1) the model fits, and (2) the auto-correlation effect, if any, is significant.

To ease computation, all continuous variables were standarized by dividing them by their respective standard errors. Nevertheless, this doesn't mean that the variables are comparable.

Finally, only party members that ratified were used in the models. A complete list of signature and ratification dates in provided in the appendix Appendix A.

Description	Homophily	Density	Size	Avg Degree	Mode Degree	Valued
Trade	No (*)	0.36	191	136.60	119.00	Yes
Minimum Distance	No	0.99	170	338.00	338.00	Yes
Shared borders (Wiki)	No	0.03	159	8.00	8.00	Yes
Centroid Distance	No	0.99	170	338.00	338.00	Yes
COP co-participation	Yes	0.30	177	105.76	78.00	No
INB co-participation	Yes	0.32	171	110.76	90.00	No

Table 1: Networks descriptive stats. In the case of the Trade network, while trading is homophilous indeed, we have no reason to belive that the implementation of the FCTC can change it significantly, hence we consider it to be exogenous to our analysis.
